About Click Tenders Africa

Click Tenders Africa (CTA) is a construction technology company providing a centralized marketplace where contractors, consultants and other construction professionals can discover verified construction tenders and access resources that support the tendering and bidding process. CTA's long-term vision is to become a leading construction procurement ecosystem in Africa, connecting construction opportunities with contractors, suppliers, financial institutions and other industry stakeholders.

We seek to recruit a Construction Research Intern to join our research function and contribute to the identification, verification and analysis of construction and infrastructure opportunities in the market.

The role provides practical exposure to the intersection of construction management, tendering, procurement research and construction-market intelligence.

Key Responsibilities

- Research and identify construction, infrastructure and related tender opportunities from official government, institutional and other reliable sources.
- Research construction projects and developments across relevant sectors, including buildings, roads, water, energy and other infrastructure.
- Assist in verifying tender and project information before it is incorporated into the company's research and information systems.
- Organize and maintain accurate databases and records of construction tenders, projects, companies and other relevant industry information.
- Monitor construction and infrastructure developments to identify emerging projects and potential opportunities in the market.
- Conduct research on construction companies, procuring entities, project owners and other relevant industry stakeholders.
- Assist in preparing concise research briefs, project summaries and construction-market insights for internal and platform use.

What We Are Looking For

- Diploma or Bachelor's degree in Construction Management, Quantity Surveying, Civil Engineering, Architecture, Building Technology or a related construction discipline.
- Genuine interest in the construction industry, infrastructure development and tendering.

- Strong research and analytical ability.
- Excellent attention to detail and accuracy.
- Good written communication and report-writing skills.
- Proficiency in Microsoft Excel and other standard office applications.
- Ability to organize information systematically and work independently.
- Curious, analytical and willing to learn.

What You Will Gain

- Practical exposure to construction tender research and market intelligence.
- Experience working with real construction and infrastructure opportunities.
- Exposure to public procurement and the commercial side of the construction industry.
- Development of research, analytical and information-management skills.
- Mentorship and professional development.
- A supportive and collaborative working environment.
- Internship stipend plus performance-based bonuses.

How to Apply

Interested candidates should submit their applications through **Click Tenders Africa ‘careers’** on or before **10th September 2026**.
